

PortionPac Chemical Corporation was presented with Mayor Daley's 2007 Greenworks Award. The Mayor's awards are judged by independent panels of local sustainability experts and work to promote a green city by recognizing businesses, non-profits, schools and government agencies whose buildings, practices, and products or services are environmentally responsible. PortionPac was one of 44 nominees from businesses, non-profit organizations, schools and governmental agencies submitting applications in one of three categories: GreenBuilding, Green Practice, or Green Product.

This year PortionPac was chosen for the Green Practice award which is given to firms whose day-to-day practices reduce an organization's environmental impact through operations, purchasing, transportation, etc. Although PortionPac and most companies today are changing their own day to day practices to reduce waste of energy and materials, PortionPac is also taking a second and more important step to extend that impact to its customers.

PortionPac pioneered a modern method of sale and support to positively impact environmental needs while also improving productivity and performance. The concept is called Shared Savings, or Flat Fee. It shifts the emphasis from selling cleaning "products" to selling clean buildings and puts the buyer and the seller on the same side of the table working together for efficient, environmentally responsible, and safer cleaning processes.

In addition to this year's recognition from Mayor Daley, PortionPac won the GreenWorks award in 2006 for the environmental benefits of the PortionPac product system. In 2006 PortionPac was also recognized by the State of Illinois and received the Governor's Pollution Prevention Award for helping the environment and the economy of Illinois by successfully reducing the generation of gaseous, liquid, and solid waste.

PortionPac manufactures highly concentrated, pre-measured cleaning products that reduce the resources used throughout the lifecycle of production, storage, distribution and disposal, minimize the adverse effects of chemicals on the environment, and eliminate the unsafe and ineffective habits of traditional cleaning procedures. PortionPac's Cleaning Systems provide sustainable solutions that are the most cost-effective and environmentally friendly in the industry.
