PortionPac...a Winning Workplace

Well...Who could have imagined it?

Forty six years ago when we started PortionPac we had some pretty ambitious objectives...revolutionize the detergent industry, set up new distribution systems, upgrade the education and respect for people who do the cleaning, etc. etc.

Needless to say some of those goals are still a work in progress...but...I never expected our company to be a role model for American Industry!

Yesterday, Winning Workplaces, an organization that recognizes companies that are good places to work and Inc. Magazine featured our company as:

"What smart, principled and effective management looks like in 2010"

Well to put it simply, out of 500 candidates we have been selected as one of the Top Small Company Workplaces in the country. I think you would enjoy a reading the entire magazine but [here is a link](#) to the 6 page article about PortionPac.

Many of you have contributed to and supported our program for decades...and on behalf of everyone at PortionPac, CorrectPac and SFSPac, thank you.

And most important we hope our products, programs and systems have also helped your department to be a professional, safe and productive workplace.
